Hello Dipan,

Welcome to AltaLab!

Today, you are joining the AltaLab Fall 2026 cohort and beginning the first stage of your AltaLab journey — the Online Sprint.

Day 1 is now available on Evolve, the platform where you will find all program lectures, assignments, and chapter materials. **Please log in to Evolve using the same email address where you received this message.**

The Online Sprint is also the first step toward the next stage of AltaLab: selected teams will be invited to continue to the Founder Residency.

Program structure and schedule

The Online Sprint includes six chapters. Each chapter, except for the final one, is available in two versions:

- Core Track — the full version, built for early-stage projects.
- Focused Track — a shorter version for teams that have already completed some of the relevant steps.

You will also have access to six Advanced Modules (A), which explore specific challenges that often emerge once a company gains traction.

New chapters will be released every Monday and Thursday. Each chapter includes lectures and assignments that you can complete independently and apply to your own project. We recommend following the release schedule, but you are welcome to progress at your own pace.

You will receive a separate email with access to each new day's materials as they become available on Evolve.

The module schedule is:

Day 1 — September 7

Day 2 — September 10

Day 3 — September 14

Day 4 — September 17

Day 5 — September 21

Day 6 — September 24

The final deadline for completing all assignments is **September 27 at 23:59 PT.**

Before you begin, there are two things you need to do:

1. Complete the Track Assessment

The assessment includes 12 short questions and takes around 3–5 minutes. It is not a test of what you know — it helps identify where your project is today.

Based on your answers, you will receive a personalized learning map recommending which version of each chapter to start with and which Advanced Modules may be most useful for your team.

There are no right or wrong answers, and the assessment does not limit your access to the materials. Everything remains open to everyone. Your map is a recommendation, and you can switch tracks for any chapter at any point during the Sprint.

The assessment is provided as an HTML file. Please download the file from Google Drive and open it in your web browser to complete the quiz.

[Download the Track Assessment →](#)

2. Once you have completed the assessment, use your learning map to choose the route that best fits your team:

[Open the Core Track: Day 1 →](#)

[Open the Focused Track: Day 1 →](#)

[Open the A1 \(Advanced\): Focus Collapse after Traction →](#)

The Core Track and Focused Track form the main Online Sprint, and your assessment results will help you choose the most relevant version of each chapter for your team. Your work in these chapters will be considered during the selection process for the Founder Residency.

The Advanced Modules are optional. Use them to explore specific topics that are relevant to your project, but they are not required to complete the main Sprint.

In the first assignment, please submit either your personalized map image or the result code generated by the assessment. You will find the result code at the bottom of your personalized map.

3. Join the AltaLab Fall 2026 Group

Join [the AltaLab Telegram group](#) to connect with other founders in the cohort, exchange ideas, and discuss the program materials.

The group is also the fastest way to receive support from the AltaIR and AltaLab teams. If you have questions about the platform, materials, assignments, or your learning path, you can ask them there.

Spoiler: joining the group may help you complete one of the Day 1 practical tasks — details are included in the assignment itself 😊

If you have any questions, feel free to contact us at n.bogachev@altair.vc.

We're happy to have you with us and look forward to seeing your progress throughout the Sprint.

Best regards,

The AltaLab Team
